Participation in the development of frontend functionalities

### Web development

Depuis janvier 2023 [A mon propre compte](#) Cotonou

Creation of a personal website to present my skills, experiences and projects.

## Comp tences

Node js

Tailswind css

React JS

JavaScript

CSS

HTML

## R alisations

### Project: Daily Frontend Challenge on FrontendMentor.io

Depuis octobre 2023 [Personnal project](#) Cotonou

Personal commitment to complete one frontend challenge per day on [FrontendMentor.io](#). Each challenge represents a model to reproduce using HTML, CSS and sometimes JavaScript. The goal is to continually improve my frontend development skills by tackling various concepts such as responsive layout, CSS animations and the integration of interactive features.

### Personal Website Project

Janvier 2023 [Personnal project](#) Cotonou

Creation of a personal website to present my skills, experiences and projects. Using React JS and CSS to design a modern and responsive interface.

### Project of Online CV Generator with React JS

D cembre 2023 [Personnal project](#) Cotonou

I recently developed an online CV generator using React JS, a popular JavaScript library. This project allowed me to leverage my front-end development skills to create an intuitive and user-friendly platform where users can easily create and customize their CVs. By utilizing React JS, I was able to develop reusable and modular components, enabling efficient UI management and a seamless user experience. I integrated features such as real-time editing, instant preview of the CV, and export of the final CV in PDF format.
